There are many ways to look after and protect your Jeep® stroller. The most important is to clean up any spills or food, before it dries on the fabric.

As the covers are not designed to be easily taken off for washing, (for safety reasons) the easiest method to clean is, sponge the surfaces with a mild solution of warm water liquid laundry detergent. Rinse well with clean sponge and leave to dry out of direct sun.

Sand and Salt water should be rinsed with a hose and wiped dry to prolong the life of the wheels, axles and other moving parts.

Never use petroleum based lubricants on your stroller, the most suitable lubricants are silicone based products.
